

YOUR TARGET: ZERO ACCIDENTS

**PIONEER OF PEDESTRIAN
PROXIMITY DETECTION**

**ROBUST AI CAMERA
FOR SAVING LIVES:**

- Detect & localize people to prevent collisions
- Monitor & reduce your risk of accidents

Integrated
cloud-based
solution

PEDESTRIAN DETECTION SOLUTION: AI FOR SAVING LIVES

- The only industrial-grade AI camera able to **detect and localize pedestrians in real time**
- Alerts the driver to danger and helps **prevent serious accidents** on industrial sites
- **No pedestrian tags** needed
- Detects **any postures** (i.e. standing, crouching, partial view) to prevent collisions with mobile equipment, whether **driving forward or in reverse**

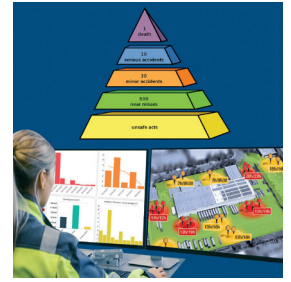

VEHICLE DETECTION SOLUTION: COLLISION AVOIDANCE

- **Detects the presence and position of vehicles** around another one
- Goes **beyond pedestrian detection and avoids vehicle/vehicle collisions**
- Ensures a **safer working environment and optimizes operational processes**

CONNECT SOLUTION: SAFETY & PRODUCTIVITY ANALYTICS

- **Monitors & reduces the risk of vehicle/pedestrian collisions by a factor of 3**
- Highlights **the most dangerous machines** and determines **the time and place where the risk of accident is highest**
- **Measures the effectiveness of the preventive actions implemented** to prevent accidents between vehicles and pedestrians

CHECKLIST SOLUTION: PRE-STARTUP VEHICLE SAFETY REVIEW

- ✓ **Improved Workplace Safety**
- ✓ **Reduced Equipment Downtime**
- ✓ **Reduced Maintenance Costs**
- ✓ **Automatic Recording of Daily Logs**

- **Customizable** list of checks depending on machine models & operational environments ⁽¹⁾
- **Access control:** once all checks have been completed, the vehicle **can be safely turned-on**, providing total peace of mind to operators and their employers ⁽¹⁾

Are you noticing a leak of fuel, hydraulic oil, engine oil or radiator coolant?

Yes

No
